Screen stream mirroring pro apkpure

FOLLOW US Screen Stream Mirroring is the most powerful app for mirroring and transferring your Android screen and audio in real time! You can share your screen live like a dual screen on any device or PC on the same network via Media Player, Web browser, Chromecast and UPnP/DLNA devices (Smart TV or other compatible devices). You can make powerful presentations for work, education or gaming. You can transfer everything live to Twitch, Youtube Gaming, Facebook, Ustream and all other popular internet streaming servers: perfect to broadcast your favorite games. You can also record it in video files. This is the free version of Screen Stream Mirroring. If you want to be sure that the application works with your device, you can use it before you buy the Pro version. The free version has a time limit for each application run. The following features are available: [✓] No root: Before Android 5.0, you need to run our startup tool from your computer to enable screen mirroring. [✓] Mirroring, screen sharing with media players and tools such as VLC, XBMC/KODI, OBS (Open Broadcaster Software) and other... [✓] mirroring, screen sharing with web browsers [✓] Broadcasting to Twitch, Youtube (Youtube Gaming), Facebook Live, Ustream and others... [✓] Mirroring, screen sharing with UPnP/DLNA video players such as XBMC/KODI [✓] Mirroring, screen sharing with UPnP/DLNA devices such as Smart TV, Blu Ray players, and other compatible devices [✓] Google Cast™ Ready (Chromecast) [✓] streaming timer and stop when lock screen [✓] Camera overlay widget, while you are streaming [✓] image overlays and web overlays (Android 5+) [✓] Twitch chat preview while you are sending [✓] internal audio and microphone audio streaming [✓] Mixed (internal + microphone) audio streaming [✓] recording [✓] screen drawing during mirroring (perfect for demoing) [✓] Compatible with network tethering (Wi-Fi, Bluetooth, USB) [✓] Many settings for optimizing performance [✓] Any number of connections can be made so that multiple people can connect at the same time PLEASE READ instructions before installing our app : Do not use reviews to report problems or if you have any questions.
